locate guests quickly with
instant and discreet paging

CustomerCall

locate guests quickly with instant and discreet paging

CustomerCall is perfect in club & hotel bistros, leisure and service industries for locating customers when their food or table is ready

Customers are more relaxed and happier as they now know exactly when their meal order is ready. Your customers no longer have to wait for their number to be called on the overhead paging system or displayed on a light board, which are often not seen or heard.

No more crowded bistro lines or congested service areas.

The system is ideal for use in:

- Bistros and cafés for waiting for a meal or drink order
- Hospitals and medical centres for alerting a patient when the doctor is ready to see them
- Restaurants to alert patrons when their table is ready
- Carwashes to notify customers when their car is ready
- Nurseries and child minding facilities when a parent needs to be called
- Noisy environments where overhead paging may be inefficient.

The CustomerCall System Features:

- Silent vibration/ tone/ flash & custom voice option
- Standard out of range and search facility
- Secure transmission
- Instant contact
- Robust and Durable
- Supports up to 999 pagers
- Superior 2 watt transmitter for high quality in-building coverage
- Extended transmission range options available
- Full training and support
- Range up to 1km or more.
